Dear Governor Ivey

I hope this finds you well. On behalf of our association, we are grateful for your incredible job in leading so many in your state through a great crisis.

I need to raise a concern that affects the health and well-being of millions of our fellow citizens. I am urging for clarification that health and nutrition stores such which provide essential vitamins (i.e. vitamin D) and other nutrients that help keep our immune systems healthy as well as providing a variety of other foods and supplements should be deemed "essential" in this time of crisis for the purposes of vaccination.

There is uncertainty right now created by individual interpretations on whether health and nutrition stores have been deemed essential retail establishments. For the millions of people who rely on stores that retail dietary supplements this uncertainty is troubling and could cause such stores to close unnecessarily, and not allow their front-line workers to have access to vaccination per schedule 1C of the COVID-19 vaccination disbursement.

Dietary supplement manufacturers are specifically referred to as essential in the latest CISA guidance (version 4.0), so this would be consistent with that existing policy, and the whole supply chain would have access to vaccination. I believe, that this issue could be simply resolved if the interpretation on retail storefronts by all local jurisdictions was coordinated with the federal guidelines thus putting all health and nutrition stores on par with grocery and drug stores as essential businesses. The majority of states (47) deemed all health and nutrition stores on par with grocery and drug stores as essential businesses during the spring of 2020, thus the vaccination scheduling of these essential workers would also be consistent with precedent. The millions who use dietary supplements to stay healthy would continue to do so uninterrupted. Their continued access is very important, especially at a time when health is so important.

Anything you can do, to facilitate this request would be most appreciated. Please feel free to contact me any time.

All my best wishes to you and your entire team.

Dietary supplement manufacturers are specifically referred to as essential in the latest CISA guidance (version 4.0), so this would be consistent with that existing policy, and the whole supply chain would have access to vaccination. I believe, that this issue could be simply resolved if the interpretation on retail storefronts by all local jurisdictions was coordinated with the federal guidelines thus putting all health and nutrition stores on par with grocery and drug stores as essential businesses. The majority of states (47) deemed all health and nutrition stores on par with grocery and drug stores as essential businesses during the spring of 2020, thus the vaccination scheduling of these essential workers would also be consistent with precedent. The millions who use dietary supplements to stay healthy would continue to do so uninterrupted. Their continued access is very important, especially at a time when health is so important.

Anything you can do, to facilitate this request would be most appreciated. Please feel free to contact me any time.

All my best wishes to you and your entire team.

Dear Governor Kelly

I hope this finds you well. On behalf of our association, we are grateful for your incredible job in leading so many in your state through a great crisis.

I need to raise a concern that affects the health and well-being of millions of our fellow citizens. I am urging for clarification that health and nutrition stores such which provide essential vitamins (i.e. vitamin D) and other nutrients that help keep our immune systems healthy as well as providing a variety of other foods and supplements should be deemed "essential" in this time of crisis for the purposes of vaccination.

There is uncertainty right now created by individual interpretations on whether health and nutrition stores have been deemed essential retail establishments. For the millions of people who rely on stores that retail dietary supplements this uncertainty is troubling and could cause such stores to close unnecessarily, and not allow their front-line workers to have access to vaccination per schedule 1C of the COVID-19 vaccination disbursement.

Dietary supplement manufacturers are specifically referred to as essential in the latest CISA guidance (version 4.0), so this would be consistent with that existing policy, and the whole supply chain would have access to vaccination. I believe, that this issue could be simply resolved if the interpretation on retail storefronts by all local jurisdictions was coordinated with the federal guidelines thus putting all health and nutrition stores on par with grocery and drug stores as essential businesses. The majority of states (47) deemed all health and nutrition stores on par with grocery and drug stores as essential businesses during the spring of 2020, thus the vaccination scheduling of these essential workers would also be consistent with precedent. The millions who use dietary supplements to stay healthy would continue to do so uninterrupted. Their continued access is very important, especially at a time when health is so important.

Dear Governor Cuomo

I hope this finds you well. On behalf of our association, we are grateful for your incredible job in leading so many in your state through a great crisis.

I need to raise a concern that affects the health and well-being of millions of our fellow citizens. I am urging for clarification that health and nutrition stores such which provide essential vitamins (i.e. vitamin D) and other nutrients that help keep our immune systems healthy as well as providing a variety of other foods and supplements should be deemed "essential" in this time of crisis for the purposes of vaccination.

There is uncertainty right now created by individual interpretations on whether health and nutrition stores have been deemed essential retail establishments. For the millions of people who rely on stores that retail dietary supplements this uncertainty is troubling and could cause such stores to close unnecessarily, and not allow their front-line workers to have access to vaccination per schedule 1C of the COVID-19 vaccination disbursement.

Dietary supplement manufacturers are specifically referred to as essential in the latest CISA guidance (version 4.0), so this would be consistent with that existing policy, and the whole supply chain would have access to vaccination. I believe, that this issue could be simply resolved if the interpretation on retail storefronts by all local jurisdictions was coordinated with the federal guidelines thus putting all health and nutrition stores on par with grocery and drug stores as essential businesses. The majority of states (47) deemed all health and nutrition stores on par with grocery and drug stores as essential businesses during the spring of 2020, thus the vaccination scheduling of these essential workers would also be consistent with precedent. The millions who use dietary supplements to stay healthy would continue to do so uninterrupted. Their continued access is very important, especially at a time when health is so important.

Anything you can do, to facilitate this request would be most appreciated. Please feel free to contact me any time.

All my best wishes to you and your entire team.

Dietary supplement manufacturers are specifically referred to as essential in the latest CISA guidance (version 4.0), so this would be consistent with that existing policy, and the whole supply chain would have access to vaccination. I believe, that this issue could be simply resolved if the interpretation on retail storefronts by all local jurisdictions was coordinated with the federal guidelines thus putting all health and nutrition stores on par with grocery and drug stores as essential businesses. The majority of states (47) deemed all health and nutrition stores on par with grocery and drug stores as essential businesses during the spring of 2020, thus the vaccination scheduling of these essential workers would also be consistent with precedent. The millions who use dietary supplements to stay healthy would continue to do so uninterrupted. Their continued access is very important, especially at a time when health is so important.

Anything you can do, to facilitate this request would be most appreciated. Please feel free to contact me any time.

All my best wishes to you and your entire team.

Dear Governor Bryan

I hope this finds you well. On behalf of our association, we are grateful for your incredible job in leading so many in your state through a great crisis.

I need to raise a concern that affects the health and well-being of millions of our fellow citizens. I am urging for clarification that health and nutrition stores such which provide essential vitamins (i.e. vitamin D) and other nutrients that help keep our immune systems healthy as well as providing a variety of other foods and supplements should be deemed "essential" in this time of crisis for the purposes of vaccination.

There is uncertainty right now created by individual interpretations on whether health and nutrition stores have been deemed essential retail establishments. For the millions of people who rely on stores that retail dietary supplements this uncertainty is troubling and could cause such stores to close unnecessarily, and not allow their front-line workers to have access to vaccination per schedule 1C of the COVID-19 vaccination disbursement.

Dietary supplement manufacturers are specifically referred to as essential in the latest CISA guidance (version 4.0), so this would be consistent with that existing policy, and the whole supply chain would have access to vaccination. I believe, that this issue could be simply resolved if the interpretation on retail storefronts by all local jurisdictions was coordinated with the federal guidelines thus putting all health and nutrition stores on par with grocery and drug stores as essential businesses.
