Script for Calling Your United States Senator

As someone personally invested in the natural products industry its easy to see how nutritional supplements have personally helped thousands of people look and feel their absolute best. It would be unfortunate to make it difficult for people to get their hands on these amazing products that help enhance every area of their lives. I know it has personally helped me tremendously and I hope these impactful products can continue to help others. Let's keep uplifting, impacting, and empowering Americans to feel their best!

Responsible natural products retailers and manufacturers go to great lengths to ensure consumers have access to safe products. We have built a strong reputation and brand loyalty with the millions of American consumers who use these products every day.

The proposed language in the Dietary Supplement Listing Act of 2022 requires pre-market approval for dietary supplements. The FDA already has access to information regarding who is making dietary supplements, where they are making them, what products are made at which facilities, when new ingredients are introduced into commerce, and whether any products are associated with serious adverse events.

I strongly urge you to oppose the Dietary Supplement Listing Act of 2022 and its inclusion in the FDA Safety Landmark Advancements Act.
